

Dear students,

I am writing you to inform you that we have some undergraduate research opportunities in our group at Caltech in Mechanical and Civil Engineering Department. I am hoping that you can help me advertise these opportunities at Occidental College to those interested in mechanics, physics, applied math and computer science. This is a great avenue for those interested in pursuing graduate school to build up their resume/research experiences. Here is a [link](#) for more information. Interested students can contact me directly (monfared@caltech.edu) by Feb. 7th if they have questions/need more information.

Best,
Siavash
